W. M. HAYS, Assistant Secretary, in Charge.

NORWAY, SWEDEN, AND RUSSIA

AS MARKETS FOR

PACKING-HOUSE PRODUCTS.

IMPORTS FROM PRINCIPAL COUNTRIES,
1895-1904.

Prepared by the
DIVISION OF FOREIGN MARKETS.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1906.

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
BUREAU OF STATISTICS,
Washington, D. C., January 9, 1906.

SIR: I have the honor to offer for publication the manuscript of a bulletin prepared under the direction of George K. Holmes, Chief of the Division of Foreign Markets, concerning the imports of meat animals and packing-house products into Norway, Sweden, and Russia. The information has been obtained from the published official reports of those countries and indicates the quantities and values of the imported commodities, under such classifications as are adopted, as far back as 1895.

This detailed information discloses the foreign-trade situation with regard to meat animals and packing-house products in those three countries as has never been done before in this country, and should be particularly useful to all exporters of these animals and their products.

It is recommended that this matter may be speedily published as Bulletin No. 41 of this Bureau.

Respectfully,

W. M. HAYS,
Assistant Secretary, in Charge.

Hon. JAMES WILSON,
Secretary of Agriculture.

NORWAY, SWEDEN, AND RUSSIA AS MARKETS FOR PACKING-HOUSE PRODUCTS.

NORWAY.

IMPORTS INCREASE 29 PER CENT.

While Norway's imports of live meat animals and packing-house products are not large, they increased 29 per cent from 1895-1897 to 1902-1904, from a mean yearly value of \$3,552,000 during the first period to \$4,585,000 during the last one. Of these values live meat animals amounted to an average of \$478,000 during 1895-1897 and \$494,000 in 1902-1904. Nearly all the cattle, sheep, and swine imported into this country during the ten years 1895-1904 came from Sweden. During 1902-1904 99.8 per cent of all the cattle imported and 97.3 per cent of the sheep were of Swedish origin.

Packing-house products increased from a mean yearly value of \$3,068,000 during 1895-1897 to \$4,040,000 during 1902-1904, a gain of 32 per cent. Of these articles imported during the last three-year period 43 per cent consisted of tallow and oleo oil, 22 per cent of pork, 18 per cent of other meat, and 13 per cent of lard and fats, these items making a total of 96 per cent of all the packing-house products imported. The United States furnished a yearly average of 6,558,000 pounds of tallow and oleo oil to Norway during 1902-1904, or 34 per cent of the total imports of these articles. Denmark sent 4,297,000 pounds a year, or 22 per cent, while more than 3,000,000 pounds each came from Germany and the United Kingdom.

The pork imported by Norway comes chiefly from Germany and Denmark, and consists principally of unsmoked meat. Receipts of pork from the United States in 1902-1904 were valued at about \$142,000 a year, or 16 per cent of the total. The market for good United States hams, such as find ready sale in some other European countries, is not developed in Norway. Since 1898, when 520,000 pounds were received from all countries, imports of hams have continued to decline. Imports in 1900 were 303,000 pounds; in 1902, 203,000; and in 1904, 102,000 pounds, more than one-half of which came from Denmark and only 16,000 pounds from the United States.

b Less than \$50.

SWEDEN.

MOSTLY PACKING-HOUSE PRODUCTS.

While animals are admitted free of duty into Sweden, most of the packing-house products have to pay rather high duties, and the imports are, therefore, not very great, though gradually increasing. The value of the annual imports of all articles specified in Table 2 averaged \$2,604,000 in 1895-1897 and \$4,227,000 in 1901-1903, which shows an increase of 62.3 per cent.

Live animals are imported in very small numbers, their value in 1901-1903 being only \$100,000 annually. These consist mainly of cattle brought from Finland, \$80,000 annually.

Of the packing-house products, the most important are animal fats and pork other than salted. The average annual imports of fats, tallow, and oleo oil in 1901-1903 amounted to 34.3 per cent of all the imports of the packing-house products, and pork other than smoked to 37.7 per cent. Considerable quantities of oleomargarin were imported into Sweden until 1899, mainly from Norway, but since that year they were substituted by equally large quantities of oleo oil from Denmark and Germany.

Germany and Denmark are the most important sources of the packing-house products imported into Sweden, large quantities of pork, tallow, and other fats coming from both these countries, while smaller quantities of the same articles are shipped from the United Kingdom. The Danish pork is crowding out the British pork. Thus, while the imports of pork other than smoked from Germany have decreased from 5,924,000 pounds in 1895-1897 to 5,753,000 pounds in 1901-1903, and the imports from the United Kingdom from 4,857,000 pounds to 1,972,000 pounds, the imports from Denmark have increased from 307,000 pounds to 2,609,000 pounds.

The share of the United States in the imports of packing-house products is very insignificant indeed. Small quantities of pork and fats were shipped prior to 1900, but from 1900 there were no shipments at all of packing-house products, save less than 18,000 pounds of pork in 1901.

RUSSIA.

NOT AN INCREASING MARKET.

Russia being primarily an agricultural country with an enormous export of grain, and the Russian people consuming very small quantities of meats, the imports of meat animals and packing-house products are very small and do not show any strong tendency to increase.

The average annual imports of the articles of Table 3 for 1895-1897 were \$3,452,000; in 1898-1900, \$5,116,000; and in 1901-1903, \$4,337,000; an increase of 25.6 per cent, if the first and third periods are compared, but a decrease of 15.2 per cent from the second to the third period. The increase from 1895-1897 to 1901-1903 is only a seeming one, because many items were not separately stated in the former period, as sausage casings, stearin, and others.

The main articles of imports are cattle (annual average for the last three years, \$954,000); sheep and goats (annual average, \$977,000); and animal fats (\$1,838,000). These three articles amount to 87 per cent of the total imports of the articles specified in Table 3.

Live animals from Asia.—Asia is the main source of the live animals imported. In 1903 China, Afghanistan, and Persia supplied 58 per cent of the value of all the imported live animals. Besides, Korea sent 40,000 head of cattle, valued at \$413,000, which brings the share of Asia up to 76.7 per cent, and Roumania sent 14 per cent. This indicates that the imports of live animals are not intended for the normal market of European Russia, but go mainly to supply the demands of the large army in Asia, the Siberian railway not being able to carry the necessary supply. The supply of animals from China and Afghanistan grew considerably only during the last few years, and Korea sent no cattle in 1901, 16,000 head in 1902, and 40,000 in 1903.

Animal fats from Europe.—On the other hand, the packing-house products come in mainly across the European frontier, the United Kingdom supplying 59.2 per cent, evidently reexports, while Germany contributed 17.7 per cent. Animal fats constituted the main packing-house product, equaling 80.9 per cent of all the packing-house products during 1901-1903. About three-quarters of the fats came from the United Kingdom, and one-eighth from Germany.

Insignificant trade of the United States.—The direct share of the United States in this trade is very insignificant. The average imports from the United States in 1895-1897 were \$135,000, or 3.9 per cent, and in 1901-1903, \$130,000, or 3 per cent of the total items of Table 3. The only products the imports of which from this country are of importance are the animal fats, and of these products the share of the United States has decreased from 7.7 per cent in 1895-1897 to 6.1 per cent in 1901-1903.

TABLE 3.—Imports for consumption of meat animals and packing-house products into
RUSSIA, 1895–1903.
